Sixteen Freight Cars Derailed

Didsbury people were shown how expertly a C.P.R. wrecking crew could straighten out a derailed train on Thursday morning last.

Sixteen cars of a freight train were thrown off the track at 2.15 in the morning when a broken arch on one of the cars struck the switch south of the depot. The cars were thrown partly over the side track and held up the passenger.

The wrecking train was sent from Calgary and shortly after 8 a.m. the side track was cleared so the passenger trains got through.

Shortly after noon the sixteen cars had been put on the main line and the track repaired.

No one was hurt in the accident and very little damage was done.

BIRTHS

at Didsbury General Hospital

March 20 to Mr. and Mrs. Henry Harder a son.

March 25 to Mr. and Mrs. Otto C. Harder, Carstairs, a son.

March 27 to Mr. and Mrs. Remi LeClaire a son.

Local Players Give Splendid Presentation

A full house greeted the Knox United Players on Friday evening when they presented the three-act comedy-drama, "Eyes of Love," at the Opera House, and the audience were very appreciative of the splendid interpretation given by the players.

Mrs. Dave Edwards as "Mrs. Barry" and Al Thomas as "Judge Barry," made ideal parents, while Dorothy Ranton, who had the leading part as their adopted daughter, "Gaylia," and who was in love with "Royal Manton" (Ward Wyman), gave an excellent interpretation of a rather difficult part. Elsie Goertz as "Reeta" (a treacherous cousin) and John Goertz as "Burt" (Gaylia's unfavored suitor), did their parts well, somewhat mean at the beginning, but good sports at the end. Dave Jenkins as "Trusty Jim," the man of mystery, who turned out to be Gaylia's father, had a double role as escaped convict and itinerant Italian.

The comedy was well done by Ruth Johnston ("Carolina"), who made an excellent negro mammy, and Mrs. Walter McCoy ("Lora"), "a pert housemaid," was a splendid foil to Jim Halton (the "butler-detective," Clarke), who with his wig, sideburns, livery and wisecracks made lots of fun.

The stage settings were up to the mark and the dresses worn by the ladies were in the latest mode.

Mrs. Wallace, who directed the play is to be congratulated on her efforts in presenting so good a performance.

The Didsbury School Orchestra gave their usual excellent rendition of selections before and between acts.

The committee in charge of the play wish through the Pioneer to extend thanks to the Builders' Hardware for supplying furniture for the stage, and to all others who responded by loaning furnishings, suits and dresses, etc. Also to thank Mr. Ford and the School Orchestra for their contribution to the evening's successful entertainment.

Change In Show Nights

Mr. W. H. B. Sharp announces that commencing next week there will be a change in show nights.

The mid week show will be on Wednesday night only and prices for the mid week show have been reduced to 20c and 10c.

The weekend show will be screened both Friday and Saturday nights when regular prices will prevail.

This week's pictures are: Tonight (Thursday) "Sweepstakes Annie," with Marion Nixon and Tom Brown and on Saturday "Silver Streak," with Sally Beane, Charles Starrett and William Farnum.

Next Wednesday Eddie Quillan will appear in "Night Work" together with an organogue, "Sing 'Em Back Alive," featuring the Eaton Boys.

Public School Will Present Operetta

"The Magic Piper," a three-act operetta will be presented by the children of the Public School at the Opera House this Friday evening, April 8.

The operetta is based on the "Pied Piper of Hamelin" and will be presented by a cast of over 100 children, all in costume. There will be choruses by the townspeople and children, also solos by the "Mayor," the "Piper," the "Town Crier" and six other characters.

The stage settings and children in costume are being beautifully arranged and will make an effective showing.

This performance is a climax of several months' teaching of dramatics and music in the public school and promises to be an outstanding entertainment.

Delay Forecast in 1936 Spring Wheat Planting

Unsettled weather conditions throughout the spring wheat belts of this continent give indications planting will be later than usual, according to a survey by the Bank of Commerce. North American spring wheat average is expected to be above the average.

Winter wheat prospects in the United States suggest fairly heavy abandonment. There has been no relief from drought and heavy dust storms in the important southwest section of the winter wheat belt.

Obituary.

BERTHA HELEN BARTZ

Bertha Helen Bartz, wife of Mr. Carl Bartz, passed away at her home southwest of Didsbury on Tuesday morning.

Mrs. Bartz, who was 67 years of age, was born in Germany and came with her family to Didsbury in 1912 and since that time resided on the farm southwest of town.

She leaves to mourn her loss: her husband; three sons, Emil, Otto, Erwin, and three daughters, Mrs. E. Jans, Mrs. John Folkmann, and Ella, all living in the district.

The funeral will take place at the Lutheran Church, Westcott, this (Thursday) afternoon at 2 o'clock, Rev. J. J. Kuring officiating.

The funeral arrangements are in charge of the Durrer Funeral Home.

Celebrate Silver Wedding Anniversary

A number of friends gathered at the home of Mr. and Mrs. Stewart Tighe on Monday evening to celebrate the 25th anniversary of their marriage.

Bridge was enjoyed and premier honors were won by Mrs. Topley and Mr. J. A. McGhee, while consolations were awarded Mrs. J. Sheils and Mr. George Foster.

During the evening Mr. and Mrs. Tighe were presented with a gift of silver in honor of the occasion.

The following were among the guests present: Mr. and Mrs. W. D. Spence, Mr. and Mrs. Ray Lantz, Dr. and Mrs. Clarke, Dr. and Mrs. Evans, Mr. and Mrs. J. A. McGhee, Mr. and Mrs. G. A. Wallace, Mr. and Mrs. Harold Tighe, Mr. and Mrs. W. J. McCoy, Mr. and Mrs. George Foster (Carstairs), Mrs. G. Smith, Mrs. Harry Pearson, Mrs. D. Edwards, Mrs. J. Sheils, Mrs. J. Topley, Mrs. F. A. Stevens and Miss Edna King.

A number of invited guests were prevented from attending on account of the bad roads.

Govt. Takes Over Distributors Limited

All but approximately 20 out of 100 employees of Distributors Ltd., in various parts of the province, were taken over by the Liquor Control Board and the new firm of Deliveries Ltd., when the province assumed control of the distribution of beer on April 1st.

A number also will be taken over by Deliveries Ltd., which succeeds Distributors Ltd. The new firm will operate mainly for the purpose of delivering beer from the breweries to the liquor vendors' warehouses, and from these warehouses to licensees in the cities.

GOOD FRIDAY.

The business houses will all be closed next Friday (Good Friday) and therefore will be open all day next Wednesday.

Form Health Society.

A number of farmers residing east of Didsbury have organized a health society and Dr. W. G. Evans has been appointed physician for the society.

The object of the society is to obtain cheaper medical treatment through co-operation. Besides a small membership fee each member will pay 75c per month per family and will receive ordinary medical treatment, but will be expected to pay a mileage charge on calls to the country.

For operations members will pay one-third of the schedule fee, but hospital charges are not taken into consideration.

Thirty-five families have joined the society at the outset, but it is expected to add to that number in the near future.

Similar societies have been operating for some time in southern Alberta and from reports received have been very successful.

Musical Festival Going Over the Top

Secretary Stan Edwards, for the Olds Inspectorate Musical Festival, has already received more than 600 entries for competition in the musical festival to be held at Olds early in May. Entries are not yet closed and it is expected that by the time the books are closed the entry list will near the 800 mark. With such a large entry it is going to tax the ingenuity of the officials to arrange for the adjudication of so many budding musicians and speakers.

WORLD HAPPENINGS BRIEFLY TOLD

Two more Roman Catholic monks have been arrested in Germany charged with smuggling money to the Netherlands, it was announced.

Well-informed quarters said the British government was considering the possibility of holding a seven-power naval conference before the end of this year.

Concluding one of the most successful years in its history, the Canadian Club of New York re-elected Ernest W. Appleby president for a second term.

Deaths in Ceylon's malaria epidemic totalled 82,637 since last November, it was revealed with publication of figures showing 15,933 malaria deaths during April.

L. R. Cordeau, chairman of the Quebec liquor commission, announced that restaurants henceforth will be allowed to sell beer and wine with meals on holidays and Sundays.

James W. Blake, the man who wrote the "Sidewalks of New York," died recently in St. Vincent's hospital, New York. Blake, 72, died penniless. He never received royalties for the song.

Destined for service as a news-gatherer, with the entire Japanese empire as its "beat," a powerful monoplane has gone to Osaka, Japan, on the Tokai Maru. It is the property of the Osaka Mainichi, Japanese newspaper.

Minister of the Interior T. G. Murphy told the House of Commons that \$225,000 will be spent this year on the Jasper-Lake Louise highway in Alberta. The money will be provided in the \$33,000,000 construction bill.

The Canadian Pacific Railway has placed an order for 7,000 tons of rails with the Dominion Steel and Coal Corporation to be rolled at the Sydney plant, it was learned. The plant is now working on a South African order.

Pioneers In Cocoa Business

Founders Of Three English Firms Were All Quakers

The Port of London Monthly, which records the export and import trade of the British Empire, digressed from the shipping business in a recent month to relate the rise of three Quaker firms who loom large in the cocoa trade, shipping to all parts of the world. The Editor relates how after a time the manufacture and sale of cocoa and chocolate in this country were embarked upon by several families of the religious denomination of Quakers. The Frys in the west of England, the Cadburys in the Midlands, and the Rowntrees in York—all belonging to the Society of Friends—were pioneers whose names are all now writ large in chocolate all over the earth. Each of the businesses, beginning in modest style, has now expanded to a size and repute which makes this trio of names known everywhere.

Retains Its Freshness

Freezing Is New Process To Keep Sweet Corn

Government agricultural experts have found that sweet corn frozen within four hours after it has been picked retains its original freshness from six months to a year. Freezing stops most of the changes which normally occur rapidly in corn. In the experiments gathering, grading, husking, scalding and cooling for freezing were all completed as rapidly as possible. The scalding, it is believed, temporarily stops the chemical action taking place in the corn and the freezing permanently stops the action so that if served six months later its original freshness is retained.

A judicious use of flowers is urged by the Quebec Tourist Bureau to make rural hotels even more attractive, since there is nothing so restful as beds of flowers in front of and around buildings in both town and country.

Don't think the man who makes the longest prayer in public can always get the longest credit.

Have No Individuality

Ants Work As Their Forebears Did 50,000,000 Years Ago

Lord love us, who would be an ant? True, ants do not suffer from unemployment. When you move a stone, there they are, all rushing about and very busy, and all doing exactly what their forebears did 50,000,000 years ago. At least, Professor Dymond, of Ontario Royal Museum, says so. He shows that all the ants have an hereditary occupation, one being a soldier, another a servant, and so on. No social changes ever take place, no reforms. The ant population have no new ideas about government, war, business, family, pleasure, or anything else. Custom rules everything with them. The ant goes on toiling not because he is a thinking, intelligent, characterful citizen, but because he has never developed the power of individuality. So he still lives in a mound, or under a stone.—London Daily Express.

Peanuts Worth Money

Error Might Have Been Costly, But Man Was Honest

The thrill of an impending christening fresh upon him, Louis De Costerio, roadhouse waiter, rushed into a candy store in North Attleboro, Mass., and ordered 25 cents worth of peanuts.

At home, he put his hand into the bag and pulled out \$750 in bills. The clerk had given him a bag containing the day's receipts. De Costerio went back and exchanged the \$750 for 25 cents worth of peanuts.

FASHION FANCIES

532

CONSERVATIVELY SMART FOR SUMMER DAYS

By Ellen Worth

For office, tea party or trip to town.

Here's one of those useful little type dresses that are dear to the hearts of the business woman.

It's a dress that does for luncheon at a smart restaurant, or for dinner in town.

It's made of exquisitely lovely sheer crepe shadowy print in pale to Copenhagen blue tones. The collar and bow are of crisp white organdie.

You'll find it very simple to sew with its easily fitted raglan sleeves. Style No. 532 is designed for sizes 14, 16, 18 years, 36, 38 and 40-inches bust. Size 16 requires 3 1/2 yards of 39-inch material with 3/4 yard of 35-inch contrasting.

Patterns 20c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

The Spring Fashion Magazine is better than ever. Entirely illustrated in color you will find it a very stimulating fashion edition. There are clothes for cruising and clothes to brighten the lives of stay-at-homes. Many delightful little models for the smaller members of the family. Of course, patterns are obtainable for the designs illustrated. Send for your copy to-day, the price is 20 cents.

When Shadows Fall

By WILL R. BIRD

There never has been a more dreadful horror on this earth than that which we call the "the Great War". There may have been more cruel slaughters in the centuries before civilization; but never since Christianity and culture became dominant. And there never have been more glorious hours than some of those we lived "over there". Horror—sure! Glory—sure!

It was an evening in late May. We had come from the trenches in front of Avion and were due for a "rest" somewhere. We had come to the sheltered side of Vimy and the companies were supposed to be quartered in the tunnels. But who could go down in those clammy shafts if it were possible to sleep in a snug bivvy you and your side kick had pushed together in a pocket of ground where the grass has grown lush and still held the heat of the sun? We had "salvaged" a sheet of the corrugated, and a few sandbags made the sides, and there we could lie and gaze at the stars until sleep overcame us, for the corrugated was only in case of rain.

We had rested all the day, with nothing to do but clean ourselves a bit and eat. The cooks had been kind, and there was mail from home—Canadian mail. In the soft evening air voices seemed to grow musical. Someone up the slope had a banjo and there was a soldiers' harmony of popular songs, earnest voices if not well trained. Away in front of us the towers of Mount St. Elloi were like sentries in the dusk. Now and then a light twinkled in the village. There were horse lines everywhere.

All was stir as the dusk thickened, and transport was on the move away back. We didn't have to do a thing but yield ourselves to delightful languor. Jimmy read bits from his letter. Some of the boys back in his home town hadn't enlisted, and his poor old mother, with three boys at the front, was a trifle bitter. We got to thinking of what she had written.

A lad we both knew appeared suddenly. He belonged to the good old 49th, and we were glad to see he had got through the Vimy show. We talked rapidly for a few moments, then all three of us stilled. Away over near Villers au Bois some infantry were in camp and all at once a bugle blew "Last Post". As the haunting sweetness of that call came over the land it seemed to put a spell upon us. Spring had come. There were flowers where there had been blasted earth and they hid the wreckage of old trenches. We were out for rest. We had come through. The voices from Canada were with us, for we had read the 49th lad parts of our letters. And something about it all made us suddenly too choked for speech, made us thrill with a pride at being there, and for that moment the glory of being fighting men swelled our hearts.

Then we rose and led our friend across the way to where some of thirteen platoon had made sleeping places, and we had decorated them with German signs that Jimmy had been carrying with him for two weeks. One read "Vieh", and the other "Pferde". The boys thought it grand to have such adornments and were waiting patiently until their stretcher bearer joined them to find out the meaning of the words, and we chuckled together as we explained. The first was "cattle" and the second "horses" and what a time there would be when those lads knew.

We walked back a distance with the Forty-niner, just walked without talking. The night was too fragrant with the falling dew and scent of flower and strong grass, too soothing with the murmur of voices, for us to talk. Then "So long, Joe". "So long, boys".

Back at our bivvy Jimmy and I sat for hours, just drinking in the night, the sounds about us, the guns firing on the Somme, the faint far-away "rattle of machine gun fire, traffic, drowsy voices. Never, as long as I live, will I forget that night. It seemed to hold us, enthrall us.

I wonder where Jimmy is now, if he remembers. It's a long time since that night, but old Vimy is still there. Supposing he's there, trying to find that very little hollow—as I'm going to do—when we go back, next summer!

Are Real Benefactors

The Mitsui family, one of the richest in Japan, has ordered five grammes of radium from the Belgian Congo at a cost of 1,000,000 yen. Four grammes will be placed at the disposal of the Cancer Institute and the other given to the Physical Research Institute.

Dry rot is a name for the decay of timber after it has been seasoned. Dry rot is usually slow in action.

Flattery is a key that has opened many a feminine heart. 2101

Walking Postal Service

Hitch-Hiking 10,000 Miles To Win Bet With Mayor

Ernest A. Wall still has his dime after 7,000 miles, but he's beginning to wonder now if he can stretch it into another 3,000 miles of hitch-hiking—without asking for handouts—if he wants to win that bet with Mayor H. E. Jenkins of Waldeck, Sask. He started out from Waldeck last July, and he must get back by July 6 of this year if he's going to collect.

Ernest and his dime were in Halifax recently. The tall, brawny westerner is a sort of walking postal service, and he picks up his odd chance carrying letters from place to place in his travels.

Last winter, when the postal business got tough, he hibernated in a New Brunswick lumber camp.

But now he's away again. He picked up some mail in Halifax, and was off with it for Prince Edward Island. Then westward to Waldeck and the bet.

Antarctic Once Tropical

Prof. Gould Says A Study Of Fossils Provided Evidence

The Antarctic regions once were tropical, Prof. L. M. Gould, of Carleton College, Northfield, Minn., who was a member of Admiral Richard E. Byrd's first south polar expedition, told members of the Royal Society of Canada at Hamilton, Ont.

Prof. Gould said a study of fossils provided evidence that in the distant past the south pole was a warm place.

The Antarctic, he added, seemed to be losing a great deal of its fridity again. There are from 2,000 to 4,000 fewer feet of ice on the mountains of the region than there were formerly.

The region is rich in mineral deposits, Prof. Gould added, including a wealth of coal, which some day may be of service to mankind. The professor led the dogsled expedition out of Little America to the Queen Maud mountains on the 1928-30 expedition. He surveyed the area.

Recipes For This Week

(By Betty Barclay)

OLD FASHIONED STRAWBERRY SHORTCAKE

- 2 cups flour
- 1/2 teaspoon salt
- 2 tablespoons sugar
- 4 teaspoons baking powder
- 3 tablespoons shortening
- 3/4 cup milk
- 1 quart berries

Sift dry ingredients; mix in shortening; add milk to make soft dough; smooth out lightly. Bake in greased deep layer cake tin in hot oven at 475 degrees F. for 20 to 25 minutes. Split, butter and spread sweetened crushed berries or other fruit between layers.

KEDGELEE (A Breakfast Dish)

- 2 cups cooked fish, fresh or canned
- 4 tablespoons butter
- 1 cup cooked rice
- Salt and pepper
- 2 hard-cooked eggs

Free the fish from skin and bone. Melt butter in a saucepan, add the fish and stir gently. Put in the rice, the whites of the hard-cooked eggs, and season to taste with salt and pepper. Move gently about over the fire until thoroughly hot, and serve on a flat dish with the yolks of the eggs, pressed through a ricer, over the top.

Reason Soap Will Float

Any soap can be made to float by manufacturing it by a process that presses air ducts into the bar, says Popular Mechanics. These ducts also speed up curing, permitting the soap to dry out from the outside. So small are the ducts that they retain air, preventing water from entering. This results in floating. The old method was to beat air into the soap before it was shaped into bars. This made the soap porous, since it was filled with minute air cells.

A male stenographer wouldn't quit a \$25 job to wash dishes for nothing.

Little Journeys In Science

FLUORINE

(By Gordon H. Guest, M.A.)

All chemical elements may be arranged in families, the members of which are closely related. Fluorine, chlorine, bromine, and iodine make up a remarkable family of non-metallic elements. The group as a whole is often called the halogens, which means producers of sea salt. They were given this name by scientists because compounds of these elements are found in sea-water. These elements have a very strong tendency to combine with metals and with hydrogen to form compounds known respectively as fluorides, bromides, and iodides, which are often called the halides. Some of the halides, such as sodium chloride (common salt), potassium chloride, and silver bromide, are of great commercial importance.

Fluorine occurs abundantly in the minerals fluor spar and cryolite. Traces of fluorine compounds are found in the bones and enamel of teeth, and small quantities have been detected in the blood, milk, and brains of animals.

Fluorine is the most active element known, and was not prepared until 1886. This difficult task was accomplished by a brilliant French scientist, Moisson, who also produced diamonds from pure charcoal. He obtained the element by the electrolysis of a fluorine compound in an apparatus constructed of platinum. Fluorine was given off at the positive electrode.

Fluorine is a pale greenish-yellow gas which may be condensed to a pale yellow liquid. It combines explosively with hydrogen, even in the dark. Many other elements, such as sulphur, phosphorus and carbon, catch fire spontaneously in fluorine, and most metals burn in it. It is interesting to know that fluorine and oxygen do not interact.

One of the most useful compounds of fluorine is hydrofluoric acid. This acid attacks glass, and hence must be kept in bottles made of gutta-percha or cersin, a sort of hard mineral substance. It is used for etching glass. For etching, the glass is covered with a film of wax, and the design to be etched on the glass is drawn on the waxed surface with a stylus. This acid is then applied to the surface and in a short time the glass is etched. The wax is then removed with turpentine.

Greenwich Clock Being Overhauled By Experts

Has Been Stopped For First Time In Over Eight Years

The clock which gives the world Greenwich Mean Time has been stopped for the first time in eight and a half years.

Its 268,000,000 ticks, one to a second, may have impaired its working slightly, so the officials at Greenwich Observatory have decided to have it overhauled.

"The clock is one of a series of four used for astronomical observations," an official of the observatory said. "It has established a record for the number of years it has run without stopping. Highly skilled workmen will undertake the delicate task of overhauling it. In the meantime, we shall give time signals by the three other clocks. They are all "master" clocks driven by electricity."

A Colorful Memorial

Man Builds Wonderful Garden In Memory Of Son

Gideon Price, sixty-eight years old, of Lattimore, N.C.—the "tulip king" of the world, with a garden of 100,000 tulips—has built up his garden as a memorial to his son who died overseas during the World War. Only Price has worked in the garden. The plots, giant color combinations that an artist would conceive, are all his. Last year he left only 5,000 tulips in the ground. He has set out at least 95,000 this year. For fear that he might run out of work this summer, Price had about 15,000 gladioli to set out. And there are hundreds of lilies and amaryllis bulbs.

Origin Of Old Term

Ancient sailors believed that the halcyon, a bird of the kingfisher family, nested on the waves about the time of the winter solstice, and that the sea remained calm and peaceful during this period; hence the term "halcyon days" for times of peace and tranquility.

Paris plans a new intellectual centre called the International City of Thought and the Arts.

CHAPTER VIII.—Continued

"You mentioned a hundred an acre?" Link tapped Pieper's bony knee. "I won't sell my share for less than two hundred an acre, two years from now. And my whole Star Loop'll go away up in value. So'll the Triple H. If irrigation works other places, it'll work here. Now Otto, you're a man of vision, of foresight. That's why you're a success to-day, and we know it! Isn't that so, Helen?"

She came promptly to the rescue. "I've heard Father say many times how shrewd you are, Mr. Pieper. That's why Link and I always come to you. We could go to Sol Hastings over in Atlas, but he wouldn't grasp the bigness of this thing. We have confidence in the Stockmen's Bank. Why, everyone has!"

Instinctively Pieper thrust his thumbs into the armpits of his vest. He started to lean back but remembered a box of cigars, and bent to open a drawer for them. Link accepted one and struck a match while Otto puffed. Smoking comfortably, he studied his visitors.

"How much is this thing to cost, did you say?"

"Oh, not much over twelve hundred."

The banker jerked forward in his chair, then settled back shaking his head. "You two should've been satisfied as you were. But no, you had

THE DIGESTIBLE COD LIVER OIL WITH THE PLUS VALUES FOR SALE BY YOUR DRUGGIST

to plaster mortgages and notes over your spreads tryin' to improve God's handiwork.

"Why not take a loan on your steers? Or have you done that elsewhere?" he demanded suspiciously.

Fleming smiled. "We trade here, Otto, unless you drive us away. Of course, I did hear Hastings has a lot of cash to lend, now he's increased his capitalization. But here's the thing: we need this small matter of eight hundred for our payroll. Got 27 men working on the dam, Otto, and she'll be finished in a couple of days. We don't want to encumber our steers; we want to get cash for them. It'll just about finish up things."

There was a moment's silence. "The pair of you owe me two thousand on a note now. There's first mortgages besides. Link, I gave you five hundred last Tuesday—"

He broke off as the girl uttered a gasp. But quickly she changed her surprised expression to a smile. "Then you'll give us the money, Mr. Pieper?"

His eyes seemed to bore through her. Of a sudden he scowled and swung away. "Can't see my way clear. Sorry. Good-day!"

Helen's heart seemed to fall in her breast. Fleming's countenance went a shade paler and his lips held apart as if he were utterly nonplussed. At last he sighed, flicked ashes from his cigar, and rose. She followed suit, her eyes hot, with the threat of mistiness welling to their brown depths.

"Don't know what we'll do," Link said regretfully. "Go see Sol Hastings is all we can do. Too bad. Helen and I agreed yuh've been so considerate, Otto, that we wanted to show our appreciation with fifty acres of land when it's irrigated. You could sell it for two hundred an acre."

Pieper resisted the impulse a moment, then swung around. "Sit down, sit down! Let me think this over once more." He pursed his lips, eyes fastened on the floor.

Inwardly the quick-moving president of the Stockmen's Bank was squirming, and his visitors knew it. If he refused the loan they would ride at once to Atlas and doubtless obtain money from his rival, the First National Bank there.

At first he had disapproved Link's plan to build the irrigation dam. Yet . . . Otto Pieper was no fool. Yesterday, riding to view the dam, he had received a shock. He had talked with Tom McLendon, the engineer in charge; he had examined blueprints and viewed every angle of the undertaking. The dam itself was small as such projects went, barricading the sharp rocky V which Silver Creek had worn over the centuries. Construction was simple. McLendon pointed out, since the Creek had been successfully diverted during the work. A half-mile long miniature lake would be created to irrigate by means of ditches Fleming's seventeen hundred and Helen Hamilton's nine hundred acres into a productive Paradise.

Pieper could not shake off the conviction that there would be a five hundred per cent. increase in the value of the two ranches and their wasteland. The notion of fifty acres as a sign of appreciation . . .

He did not notice Helen's quick despairing frown nor hear Link's swift intake of breath. Otto thought: what if the project failed?

Well, his bank owned a first mortgage on each ranch and a note signed by both partners, as well as a note signed by Link alone. If Sol Hastings took security against the youth and girl, Otto would have to bid against Hastings at a bankruptcy sale, in case it came to that.

Pieper relighted his cigar. If he kept their business he was certain to profit whether the partners succeeded or failed. Of a sudden he sat bolt upright, his thin bloodless lips going "tek! tek!" They stirred, tensely hopeful.

"Mind," Otto warned, matching his fingerprints, "I don't say this thing will succeed. Rush undertaking—rash and headstrong. I don't approve; against my judgment."

"But I concede it may. I sincerely hope it will. Er, and while I couldn't accept any reward for acting for this bank . . ." He paused significantly.

"Oh, we'll be reasonable about the price. You're the only man can buy an inch. Isn't that so, Helen?"

She nodded, scarcely crediting her

OLD PEOPLE FEEL YOUNG

Just because more years than you care to count have fled by on your life's calendar is no reason for feeling old. Age, after all, isn't a matter of years. It is a matter of health. Stay vigorous and you stay young. But how, you ask. Do it the way thousands of people of advancing years do. Take Wincarnis regularly. Wincarnis is a delicious wine, free from drugs, that brings you all the valuable elements of grapes combined with the highest grade beef and guaranteed malt extract. Its invigorating effect is almost magical—yet perfectly natural.

These valuable elements in Wincarnis give your ageing system exactly the stimulating nourishment it requires. They soothe your nerves, enrich your blood, and flood your whole body with almost youthful buoyancy and vigour.

More than 20,000 medical men have heartily endorsed Wincarnis. It is a great tonic. It will make you feel young again by creating for you new stores of strength and energy. Get Wincarnis from your druggist—Sales Agents: Harold F. Ritchie & Co. Ltd., Toronto.

ears. She watched their host draw a pad of blank notes from his desk and reach for a pen. "I'll ask you both to sign it. Jimmy!" the bank president called to his clerk bent over the huge ledger. "Bring me eight hundred dollars. How do you want it, Link? Tens, twenties, fifties? Mixed?"

He mopped his brow beaded with tiny drops of perspiration. "Gosh!" he breathed in vast relief. "Any way at all, Otto. Just so it's money!"

CHAPTER IX.

They hurried out of the Stockmen's Bank with the buoyant sense of treading on air. Once in the sunshine Helen stopped, impulsively pressing both hands on Link's arm.

"Oh!" she breathed, and her dark eyes glowed admiration. "I—I thought surely Mr. Pieper would refuse us. You were wonderful—wonderful!"

Staring down at her flushed, relieved face, he grinned. "We are lucky. But look here, Helen, that fifty acres comes out of my spread. Gosh!" He mopped his perspiring brow. "If Otto had turned us down I don't know how we'd finish the dam. Only a couple of days to go, too! We'd be ruined," he finished soberly.

"We are partners, Link, and I'll give part of that fifty acres when Pieper wants it. By the way, you

Home Guide Aids In Lifting Heavy Burden of Colds

Brings Better Control of Colds
for the Family—Easy
to Follow

A GREAT HELP TO MOTHERS

Much of the heavy burden that colds impose upon Canadian families can now be avoided—with the help of Vicks Plan for Better Control of Colds. This practical home guide to fewer and shorter colds has just three simple steps:

1. To Help Build Resistance to Colds Live normally—avoid excesses. Eat simple food and keep elimination regular. Drink plenty of water. Take some exercise daily—outdoors preferably. Get plenty of rest and sleep.

2. To Help Prevent Many Colds At the first warning nasal irritation, snifle or sneeze, use Vicks Va-tro-nol—just a few drops up each nostril. Va-tro-nol is especially designed for the nose and upper throat—where most colds start. Used in time, Va-tro-nol helps to prevent many colds—and to throw off head colds in the early stages.

3. To Help End a Cold Sooner If a cold has developed, or strikes without warning, rub throat and chest at bedtime with Vicks Vapo-Rub. Vapo-Rub acts two ways at once: (1) By stimulation through the skin, like a poultice or plaster; (2) By inhalation of its penetrating medicated vapors, direct to inflamed air-passages. Through the night, this combined vapor-poultice action loosens phlegm, soothes irritation, helps break congestion.

The worth of Vicks Plan to others has been demonstrated in clinical tests among 14,702 people—further proved in everyday home use by thousands.

What this commonsense, medically sound Plan can do for you and your family can be proved only by trying it. You'll find full directions for following it in any package of Vicks Va-tro-nol or Vicks Vapo-Rub.

didn't mention that you borrowed five hundred dollars from him the other day."

"Well," — guiltily — "that drain pipe for the ditches had to be paid for, an' the cement company was hollerin'. But shucks, I'll benefit more than you. We won't count that."

"Link, have we enough money to complete the dam?"

He was silent a moment. "I don't know. This eight hundred won't even square us with the boys on wages. I'm hoping it'll keep 'em quiet for a spell, though. It's plain we can't get another penny from Otto, but it wouldn't be honest to go to Sol Hastings at Atlas. All we can do," he said in a worried tone, "is hope for the best an' try to sell our steers for enough to see us through. A little dam costs big money, doesn't it?" he added ruefully.

Sheriff Ames Stephen across the street gestured as if to convey some information without Helen's knowledge. Link frowned and tried to make out the lawman's silent gibberish. Then his eyes travelled past Stephen, and he saw the high rear of the Flagstaff-to-Rawhide stage as it stood in front of the Half Moon Cafe.

At once he understood that Buzz Hamilton was home from the penitentiary. But the man certainly was nowhere in evidence along the street. Arriving while they were engaged with Pieper, Buzz had found no one to meet him, and more than likely he had drifted into the Half Moon for a drink.

A troubled look entered Link's grey eyes. He blamed himself for not meeting Buzz and starting him at once away from temptation. Was he to go back to drinking and gambling the moment he returned to Rawhide?

From inside his shirt he took the packet that was the eight hundred dollars of payroll money and extended it to Helen. Would you mind very much if I stay while you start back to your spread with this? I'll be along after while and we'll tend to payin' off the boys."

Helen accepted the packet hesitantly. "Why, no, I'll do that, Link. What you want to stay about doesn't concern our dam, does it?"

"No. To tell the truth, I—er—I'm goin' to have a surprise for you. Yes, sir, a mighty fine surprise." He chuckled. "But I'm not springin' it now. You'll find out in good time."

Her oval face relaxed in a smile. "Very well, Link." They moved to her pinto at the hitch rack a few feet away and he held her stirrup while Helen mounted. Once astride, she looked down at him a little anxiously. "You aren't going to—gamble?"

(To Be Continued)

Little Helps For This Week

Teach me Thy way O Lord, and lead me in a plain path. Psalm 27:2.

Lead kindly Light amid the encircling gloom,
Lead Thou me on;
The night is dark, and I am far from home,
Lead Thou me on.
Keep Thou my feet, I do not ask to see
The distant scene; one step enough for me.

God alone knows how to lead His children in the paths of holiness. He knows your character, its difficulties and hindrances. He knows exactly how each event, each trial or temptation will tell on you, and he disposes all things accordingly. The consequence of this belief, if fully grasped, will influence your whole life. You will give yourself up to God more and more unreservedly, asking nothing, wishing nothing but what He wills, not seeking to bring things about for yourself but taking all He sends joyfully, and believe the one step set before you to be enough for you to take. You will be satisfied that even though the clouds are around you and your way seems dark he is directing all, and that what seems a hindrance will prove a blessing since He wills it.

Saskatchewan farmers sold a total of 209,643 pounds of branded beef during the month of January.

The original name of Voltaire, the French author, was Francois Marie Arouet.

Treatment of Frosted Seed Grain

Formaldehyde May Do Serious Damage, Says Report.

A measure of plant disease control that is very commonly practiced, especially in cereal growing regions, is that of seed treatment. This is an effective preventative of certain diseases such as the smut diseases, in which the inoculum is seed-borne.

Because of the prevalence of frosted grain in this country, and the probable use of considerable quantity of such grain for seed purposes this spring, the treatment of it may well be considered at this time. It may be assumed that frosted grain will be reduced in vitality, and that the vigor of many of the seedlings developing from it will be low. Consequently it is important that special care be exercised to see that this damage is not further increased by seed treatment practices.

We have called attention many times before, and wish to emphasize here again, that there is a real danger of injuring seed with formaldehyde, the most commonly used chemical for treating cereal seeds. The danger is greatest with wheat, especially when the recommended proportion of 1 pint to 40 gallons of water, or 1 part to 320 parts water is exceeded. This danger applies not only to normal wheat, but in the light of our experiments to an even greater degree to frosted wheat. It is obviously more serious in frosted grain, since the combined injury is more likely to result in such a poor stand as to make re-seeding necessary. Moreover, experiments have also demonstrated that seedlings from seed injured by formaldehyde, frost, etc., are rendered more susceptible to disease and other destructive agencies.

TABLE VI.
Effect of seed treatment on emergencies of normal and frosted wheat.

Description of seed	Emergencies in percent				
	No Treatment	Formaldehyde 1:320	Formaldehyde 1:250	New Improved Ceresan	Leytusan P
Normal	97	81	54	98	96
Frosted	56	34	27	61	68

The tests were made in soil in the greenhouse. While they may not be entirely comparable to field tests and while such pronounced results may not always be obtained, they are nevertheless indicative of the danger involved in the use of formaldehyde especially on frosted grain. Moreover, they also show that this danger may be avoided by use of organic mercury dusts such as New Improved Ceresan and Leytusan P, both of which are now on the market. It should also be pointed out that both of these dusts in field tests have controlled the covered smut of wheat as satisfactorily as formaldehyde, and also that comparable results to those reported above have been obtained with oats and barley—ALBERTA UNIVERSITY REPORT.

1936 Master and Standard Chevrolets Replete with New Features

New Master and Standard Chevrolets for 1936 show marked advances in appearance and in engineering. Perfected hydraulic brakes, high-compression engines with full-length water jackets, and balanced carburetion are among the mechanical improvements. The solid steel Turret Top Fisher body is now used on the Standard as well as the Master models.

The illustrations show: Top left, the Master Six special sedan, with built-in trunk; top right, the re-styled, deeply moulded radiator grille, used on all models; lower left, the simple arrangement of Chevrolet's perfected hydraulic brakes, all models; and, lower right, a Standard sedan.

Items of Interest

Royalty arrangements by the Dominion government in return for its concession to the Abasands Oils, Ltd., to develop 640 acres of tar sands on the Horse River in Alberta, embrace 5 cents a barrel of crude bitumin and 5 cents a ton of untreated tar sands, if sold by the company. Control of the Horse River Reserve rests with the national parks branch, hence the agreement.

Date for provincial convention of the Alberta Liberal Association, for the purpose of naming a new leader to succeed Mr. Justice Howson, will not be set until some time in the early summer, Roy M. Edmanson, president of the association, stated today.

Transients coming to Alberta from other provinces will not be granted provincial relief, and such men must return to their own provinces if they need assistance because of unemployment, it was made known Saturday by A. A. Mackenzie, chairman of the Alberta Relief Commission.

Instead of picturesque, prancing cavalry horses, a motley collection of 63 cars of all ages and models will be used for transportation when Alberta's historic cavalry regiments, the 19th Alberta Dragoons and the Alberta Mounted Rifles, muster at Sarcee Camp on June 27. The two units have been amalgamated as a mechanized force to be known as the 19th Alberta Dragoons, under the command of Lieut.-Col. W. L. Oliver, O.C. of the old 19th.

O.S.A. Experimental Union 1936.

The Olds School of Agriculture Experimental Union again has available for distribution to its members some excellent seeds and plants of field and garden crops. These are listed below. Each member may make from one to four selections.

Anyone interested may become a member of the Experimental Union by paying an annual membership fee of 50c. Members of the O.S.A. Alumni Association are eligible to make selections without fee.

- 1: Potatoes (four pound samples) Early Ohio.
- 2: Potatoes (four pound samples) Vicks.
- 3: Potatoes (four pound samples) Bovee.
- 4: Potatoes (four pound samples) Netted Gem.
- 5: Potatoes (four pound samples) Irish Cobbler.
- 6: Crested Wheat Grass, "Fairway," 1/2 pound.
- 7: Western Rye Grass, "Grazier," 1 pound.
- 8: Creeping Red Fescue, 1/2 pound.
- 9: "Westerworth" Rye Grass, annual for hay, 1 pound.
- 10: "Reed" Canary Grass, for low wet land, 1/4 pound.
- 11: Collection of Alberta-Grown Vegetable Seeds.
- 12: Collection of Five Perennial Flower roots.
- 13: "Ruby" Rhubarb, two.
- 14: Elm Seedlings.
- 15: Ash Seedlings.
- 16: Collection of Home-Grown Flower Seeds.

We have limited amounts of seed of a number of the leading varieties of wheat, oats, barley and peas, but nothing strikingly new. Members who are interested are asked to write. Only a limited supply of each class of material is available, so some substitution may be necessary. No orders will be accepted after April 10.

Membership fee of fifty cents must accompany each selection. Express or postal charges amount to approximately fifty cents, and may be sent at the same time.

Where there is no station agent, shipping charges must be prepaid or postage forwarded to cover parcel post charges.

Report forms must be filled in and returned to the O.S.A. at the end of the growing season.

Master Code**Plan Delayed**

Alberta's new master code on business will not come into effect April 1 as previously forecast, but will be specially gazetted a few days later and will be in force probably before the middle of next month, it was announced by Hon E C Manning, minister of trade and industry.

"And when it does come into effect, no one will be able to see that there is any difference whatever from the present conditions," he said.

Dog Tax Bill Defeated.

Drawing a storm of criticism from all sections of the house a motion to give second reading to the government bill to impose a tax of \$1.00 on all dogs in this province was defeated by the legislature Friday, just before the house turned down an amendment to give the bill a six months' hoist. In view of the action of the assembly Speaker Tanner struck the bill from the order paper.

Gas Tax Rebate at Time of Purchase

Rebate to farmers of the gas tax of six cents per gallon will be made at the time of purchase of this fuel, Hon. E. C. Manning, provincial secretary, told the legislature Wednesday. This will replace the present system under which it takes from 2 to 6 months to get the refunds.

At the time, the house was debating second reading of the bill to provide for imposing a tax on fuel oil.

Hon. E. C. Manning To Wed.

Announcement has been made of the approaching marriage of Hon. Ernest C. Manning, minister of trade and industry and provincial secretary and Miss Muriel Aileen Preston, of Calgary, only daughter of Mrs. William Preston. It was at the Calgary Prophetic Bible Institute that the young couple first met and where romance started. Miss Preston gave her services as pianist at the Institute, where Mr. Manning has also been an active worker. Mr. Manning was the first to graduate from the Bible Institute and is the youngest minister of the crown in the history of Canada.

Education For Adults

To the testimony of others no less an authority than Dr. Walter C. Murray, president of the University of Saskatchewan recently added his opinion that there is a wide open field for educational facilities for adults and while he referred to conditions in the province in which he resides and teaches his assertion is equally applicable to the situation in the other prairie provinces.

While Dr. Murray pointed out that the development of his "unexplored field" is prevented at the present time for lack of finances he noted one very encouraging feature and that is that there was "a growing feeling of the need of education for themselves among the adults themselves."

The statement that this is an encouraging feature of the situation is no doubt inspired by the belief that if adults themselves realize the need the problem is already partially solved, for the desire will presently be followed by a more or less insistent demand and once this demand becomes sufficiently strong some way will assuredly be found to cater to the need.

This renaissance in embryo, this dawning desire on the part of adults for greater educational facilities may be ascribed to a number of causes. One of them is a growing fear lest in a world of rapidly changing conditions they may lag behind the growing consciousness of superior mentality on the part of the youngster generation.

During the depression period of the past few years the difficulty experienced by the rising generation of securing suitable employment, or even of any work at all, has resulted in a large number of the youth of both sexes remaining in school longer than, for many of them, would ordinarily have been the case. Many who would have gone out to work when they had completed a public school course or one or two years in high school, have completed high school training and gone on to University or taken post graduate courses in technical schools or other institutions, partly because they themselves sensed that when commercial and economic conditions improve they will be the better fitted for the keen struggle in competition for the work that then offers which is bound to ensue and partly because parents have felt that it is better that their offspring should spend this hiatus in improving their minds than in enforced idleness.

As a result many parents have discovered that their children are better trained and better mentally equipped than they are themselves, despite the years of experience they have had in the school of hard knocks. They have discovered that their children are able to handle with ease problems which they can only solve with painful effort and then, perhaps with much less adequacy. They have discovered that their children have learned to apply scientific methods with success in solving their problems and have had the chagrin to discover that their own "will to do", backed by years of experience has frequently failed to measure up in comparison with the more up-to-date methods of the juveniles.

Another cause of this stirring of a latent desire for more education may also be attributed to a substantial increase in the practice of reading of books and magazine and newspaper articles and more particularly on more serious subjects. This increase in reading can be traced to a desire to better understand the difficulties with which the world in general has been confronted in recent years and a hope through these channels to find some practicable solutions.

Now it is a sine qua non that the practice of reading inevitably brings about a revelation that the reader after all knows comparatively little and creates a thirst for more knowledge and more information. In this respect it is akin in its operation to the use of habit forming drugs but lacks the evil results of indulgence in narcotics. In fact, it has just the opposite effect, that of permanent stimulation. The natural sequence is a desire for the aid which the younger people are receiving in their institutions.

In schools and colleges and other educational institutions of the present day the whole aim of the courses is not to cram the students with a miscellany of facts, but rather to guide them in the selection of studies which may be of value to them and to train them to reach their own conclusions from the work they have undertaken. This is the true function of education. The more adult population appreciates this fact in the light of the demonstration which is being given them by the younger generation and are becoming increasingly anxious for similar opportunities.

Another Victim Of X-Ray

Dr. Charles Harvey Archibald, of New York, a pioneer in the development of the X-ray, is dead at Asbury Park, N.J. In 1930 he lost the middle finger of his left hand because of X-ray burns and in 1934 the left arm was amputated. The operation which brought about his death was made in an attempt to check further infection from burns.

Generates Plenty

An answer finally has been found to the puzzling problem, "how much electricity does an electric eel generate?" The answer, said Christopher W. Coates, in charge of the tropical fish department of the New York Aquarium, was from 170 to 300 volts. Coates deduced his six foot electric eel will generate well over 300 volts, enough to kill a horse.

A HINT TO YOUNG HOSTESSES

DON'T RISK FAILURES
... You can't depend on making good cake unless you use good baking powder. Canada's leading cookery experts use and recommend Magic because they know from experience it is absolutely reliable—gives the same perfect leavening every time. And Magic is so inexpensive to use. Actually—less than 1¢ worth makes a big cake. Ask your grocer for a tin—today!

Must Be Nice Song

Budapest Police Say "Gloomy Sunday" Caused Many Suicides

Budapest police have branded the song, "Gloomy Sunday," public menace No. 1 and asked all musicians and orchestras to co-operate in suppressing it, despatches said.

To its gloomy strains, the police attribute 18 suicides. The 18th, which moved the police to action, was Joseph Keller, a shoemaker. In a note to police he asked them to put on his grave 100 of the roses mentioned in the song.

Two other persons shot themselves while gypsies played the melancholy notes on violins as only Hungarian gypsies can. Some killed themselves while listening to it on a gramophone record in their homes. Two housemaids cut their employers' linens and paintings and then killed themselves after hearing the song drifting up into the servants' hall from dinner parties.

A Real Spender

Maharajah Bought Four Carloads Of Souvenirs In London

When the Maharajah of Bhavnagar left London after his recent visit, the 24-year-old ruler of half a million people took home four carloads of souvenirs. He went to England with his wife, their two little sons, his two brothers, and a retinue of servants for a seven-weeks vacation. During that time he staggered shopkeepers by the magnificence of his purchases. It took a signwriter three days to paint the addresses on the 150 crates containing the maharajah's shopping. Dogs, sporting guns, furnishing fabrics, specially made cutlery, toys, clothing and a \$5,000 automobile were on his list. Incubators for rearing chickens, apparatus for taking and exhibiting talking pictures, and kitchen utensils were other items.

For Agricultural Research

University Of Saskatchewan Receives Gift Of \$24,000

The Agricultural Research foundation of the University of Saskatchewan will receive a gift of approximately \$24,000 for the advancement of agricultural experimental research. This gift will be made possible by enactment of the Saskatchewan legislature, whereby unclaimed assets of the Saskatchewan Co-operative Elevator Company will be paid over to the fund. The existing research fund was set up from the balances to the credit of the wheat board which operated the crop year of 1919-20. This amounted to approximately \$225,000. The interest from the fund is used to carry on agricultural research work in the province.

Men Adore the Girl WHOSE HEALTH IS PERFECT

IF you have a clear skin, pink cheeks, bright eyes, you will have many ardent admirers. A tonic that will help to nourish your body is Dr. Pierce's Golden Medical Discovery. It stimulates the appetite, improves the action of the stomach, makes the food digest better, and you gain strength and greater vitality. Also pimples and eruptions caused by faulty elimination often disappear. Buy now of your neighborhood druggist. New size tablets 50 cents, liquid \$1.00. Large size, tablets or liquid \$1.35.

Letters Are Returned

Man Receives Three Out Of Five Thrown From Ships

Leo Buring of Sydney, Australia, has just received the third letter of five he had "mailed" in bottles from ships in the Pacific Ocean months ago. One bottle, thrown overboard near the Tongan Isles was found, five months later, on the Fijian shore 900 miles away. Another floated 500 miles to the North Queensland coast. The third was thrown overboard near Pago Pago. This drifted to the Gilbert Islands and was found by a native who broke it, spent the six cents placed in the envelope for postage, on tobacco or beads, and tucked the letter, which he could not read, in his belt. There it was noticed by the captain of a trading schooner, who sent it back to Buring.

Get Measured for Better Smoking!

"Pin your faith to Ogden's if you want a cigarette tobacco that's 'made to measure' for the man who wants a really better smoke—a milder, cooler, smoother cigarette.

"Satisfying? Why, there's 'an extra pair of Cheers' to every package of Ogden's Fine Cut! And now that times are better, roll-your-owners everywhere are buying the better tobacco—Ogden's. They should use the right papers, too—'Chantecler' or 'Vogue'."

OGDEN'S FINE CUT

P.S.—Your Pipe Knows Ogden's Cut Plug.

SELECTED RECIPES

HOT CROSS BUNS

1 cake compressed yeast
1 cup butter
1 teaspoon salt
1 cup white sugar
2 eggs
1 cup currants
5½ to 6 cups sifted Purity Flour
2 cups scalded milk (cooled)
1½ teaspoon cinnamon (if desired)
Method: Dissolve yeast in lukewarm milk to which 1 tablespoon sugar has been added. Add 3 cups flour, beat until smooth and let rise until light (about 1½ hours). Cream butter and sugar and add to sponge. Add well-beaten eggs, salt, currants, cinnamon, and sufficient flour to make a dough soft enough to be handled conveniently. Mix, turn out on board and knead lightly; place in greased bowl. Cover and let rise in warm place until double in bulk (about 1 to 1½ hours), then shape into round buns; place in greased shallow pans about 2 inches apart; cover and let rise until light. Glaze with egg and water; press cross on each bun with back of a knife. Bake for 15 to 20 minutes in hot oven of 400 degrees.

Live Stock Value

The Dominion Bureau of Statistics estimate the value of horses, cattle, sheep and swine in Saskatchewan during 1935 at \$80,360,000. The value of farm poultry in this province also shows a considerable increase over 1934 having reached the sum of \$5,299,000.

The European spruce sawfly has devastated thousands of acres of spruce forests in Canada, and this year has attacked evergreens in Connecticut.

There are 18 cities and towns named Union in the United States.

Just Forgot To Stop

Japanese Train Crew Penalized For Passing Important Station

Two minutes late, an express train thundered through the station of Shimizu, Japan, one of the most important stops on the line, and left the station staff and prospective passengers astounded. The station master put in a hurry call to Okitsu, the next station, and the train was stopped. Passengers for Shimizu were taken back by automobile. The train crew said they merely forgot to stop. They were penalized for negligence.

Choice Was Appropriate

Not many people watched the changing of the guard at St. James Palace one day recently. With visibility in Friary Court practically nil, there was nothing to see. But the band, barely discernible in the fog, was apparently determined to make an appropriate choice of music. The last tune they played before marching back to barracks was "Smoke Gets In Your Eyes."

ONLY FRUIT-A-TIVES GAVE LASTING RELIEF FROM CONSTIPATION

Constipation and stomach trouble banished quickly.

After suffering months from constipation, Mr. W. Huddleston, Belleville, got quick relief from Fruit-a-tives. He says, "Constipation troubled me severely for months. Nothing did any good until I tried Fruit-a-tives. They brought me quick and complete relief."

A famous doctor made Fruit-a-tives by concentrating into convenient tablets extracts of APPLES, ORANGES, FIGS, PRUNES and HERBS. The result is a remedy as natural as it is effective. Fruit-a-tives bring, not just temporary relief, but relief that lasts because of their amazing tonic effects.

FRUIT-A-TIVES
Nature's Fruits and Herbs

Prairie Farm Rehabilitation Act Calls For The Demonstration Of Methods To Control Soil Drifting

Five township or district areas were being selected in the prairie provinces as a large scale demonstration of soil drifting control and crop production "in a community effort," Minister of Agriculture Robert Weir announced in discussing progress in the government's drouth and soil drifting program. Work was being actively pushed ahead towards the study of these areas which might best represent large areas of similar drouth conditions.

"In areas where drouth has had most disastrous consequences and where soil drifting has compelled farmers to leave their lands," he stated, "special investigations will be conducted as to the best methods of reclaiming this soil, either for pasture purposes or a revised type of agriculture in which strip farming, the use of legumes, grasses and drouth resistant cereals, the use of cover crops and cultural methods will allow development of a program of agriculture which will guarantee sustenance and reasonable security to the owner."

Most of the worst areas already had been inspected. One such area had been selected finally as a basis on which to start investigational work as to the best way and means of re-establishing grasses or crops. Several more such areas will be operated.

An initial program was practically completed, he continued, for putting into effect water development projects provided for under the Prairie Farm Rehabilitation Act. A staff of engineers experienced in this type of work would be appointed immediately "so prompt assistance may be given to those desiring to avail themselves under this act in the development of surface and ground water supplies." Small water projects were being given immediate special attention.

Although it would take another year in order to make available adequate supplies of trees yet all the resources of the Dominion forestry nursery stations were being made available for tree planting in 1935. Farm home shelter belts would be demonstrated on all experimental stations as well as in selected township and reclamation areas, Mr. Weir said.

Strange Street

Amazing Story Of Toronto Man Who Gained Prominence In England

"Strange Street", the autobiography of A. Beverley Baxter, 44-year-old Torontonian who became editor-in-chief of Lord Beaverbrook's Daily Express, was prominently reviewed in London newspapers.

It relates the amazing story of the rise of the former assistant in a music shop in Toronto to a high post in Fleet street, a junior partner in the famous "Max and Bax" combine and finally to a position as a \$50,000 a year publicity executive for a British film corporation.

"Strange Street" reveals Lord Beaverbrook's undying affection for Andrew Bonar Law, "the New Brunswick boy whom he made prime minister of Great Britain."

Westerners Honored

Fellowships to enable students to continue research work at universities of the United States, Great Britain and Europe were awarded at the annual meeting in Hamilton of the Royal Society of Canada. The following were among those honored: James A. Gibson, University of British Columbia, history; Andrew McKellar, University of British Columbia, physics; Reginald Salt, University of Alberta, zoology.

It is estimated that about nine million birds annually rear their young in the isolated refuge of the Pribilof Islands in Bering Sea.

It was estimated 143,000,000 pounds of dust fall yearly on greater Montreal, according to officials at McGill University.

Finished His Sleep

Lazy Passenger Delayed Three Liners For An Hour

All because one man would not get out of bed, three great liners and more than 600 passengers were held up for an hour, and the whole of the landing service was disorganized at Tilbury Docks, England.

It was 7 a.m. when a big buff-colored ship from Australia put into the docks. In just over the hour medical and passport examinations had been concluded, and the passengers, with their baggage, had left the ship.

That is, all but one. He lay sleeping peacefully in his luxurious state-room cabin. Stewards informed him that the liner had been cleared, and was waiting to cast off from the landing stage. The reply was a deep breath.

Later he was again awakened and told that two other liners were waiting in mid-stream to come in and discharge. One was a liner from the Far East with over 400 passengers wanting to know why they could not land. Behind this was a foreign ship with 200 passengers.

Sirens blew in vain. Friends waited on the landing stages. But the ships could not put in till the other had cast away.

And the belated passenger did not leave the first vessel until two and a half hours after it had begun to discharge.

Western Wheat Quality

High Protein Content Due To Climatic Conditions

Over a broad field of specialized knowledge, touching on the scientific work, history, and agriculture of the Dominion, noted Canadian scholars discussed at McMaster University results of extensive research. It was the opening day in Hamilton for the meeting of the Royal Society of Canada.

Back in 1899 the prairie farmers had a taste of dust storms—recent scourge of the west—Dr. E. H. Oliver, of Saskatoon, one time moderator of the United Church, told members of the section.

The high protein content of western Canadian wheat, which has made it valued in the markets of the world, is due more to the climate than to the soil, Frank T. Shutt, F.R.S.C., this year's winner of the Flavelle medal, declared to members of the physical science section. The content was due, he said, to the high temperatures and scanty rainfall usually prevailing in the prairie provinces in the late summer and autumn months.

Trans-Canada Highway

Lake Shore Route Is Endorsed By Lakehead Cities

Unanimous endorsement of the Lake Superior shore route from Fort William and Port Arthur via Nipigon, Schreiber, White River to Sault Ste Marie as the Trans-Canada highway jointly was given by the Chambers of Commerce of the two lakehead cities at a special meeting.

In taking this action the two chambers renewed their affirmation of policy with regard to the unfinished section of the national road adhered to since various routes first were mooted.

A New Scotch Story

Sir Harry Lauder was the subject of a new Scotch story brought back from Glasgow by George McSweyn, official of a Memphis, Tenn., firm that furnished flooring for the singer's new home. "We wanted to take pictures of the rooms, with our floors," said McSweyn on his arrival in New York, "so we asked Sir Harry and he was very agreeable about it. He said we could take the pictures—and it would only cost us a guinea a room. Yes, we paid."

Trinidad will launch new public works projects to care for unemployed. 2101

Significance Of Jubilee

Empire Honors King Because He Is Faithful To Duty

Behind any voluntary outpouring of human sentiment, underlying the emotional manifestations in which the race delights, there is generally some sound practical instinct giving the display significance. So it is worth while to inquire what fundamental meaning is to be sought in the great jubilee demonstrations for the King and Queen of Great Britain. The strength which accrues to British government from having at its head one who represents the people as a whole, and not any particular party, class or policy, cannot be questioned. It is a strength which republics lack, and which has helped to bring dictatorships in those countries which have launched republics without first building strong traditions of self-government. Paradoxically, the King is great in just such measure as he can subordinate himself to the Crown. That symbol should do more to bind than to enlarge the personality of him who wears it temporarily. And it is primarily because King George has shown himself so fully aware of this duty of self-renunciation that his people do him such honor, as a worthy guardian of an essential part of their political machinery.

Likes Winter Here Best

Governor-General's Son Does Not Want To Leave Canada

Because he likes "the winter here best," Hon. George St. Lawrence Neufize Ponsonby, four-year-old son of the Governor-General and Lady Bessborough, does not want to leave his native Canada.

His mother related the story at the Joan of Arc Institute in Ottawa after she had told the youngster they were leaving the Dominion.

A sharp reduction of 8 per cent. in Canada in potato acreage for 1935 is indicated, according to official estimates. This reduction would bring the 1935 area in potatoes back to the 1933 level. The main reductions are in the provinces of Nova Scotia, New Brunswick, Prince Edward Island, Quebec and Ontario.

Russian Scientists Planning To Break Record In Exploring The Depths Of The Ocean

Potatoes As Stock Feed

True Value Is Not Fully Recognized In Canada

When the true value of potatoes as feed for livestock and poultry is realized, much larger quantities than at present employed will be used. With high prices for stock and poultry feeds and a surplus of potatoes in Eastern Canada, stock raisers near the plentiful supplies of potatoes have a good opportunity to reduce their feed bills by feeding potatoes. Other countries make much use of potatoes as stock-feed. In Germany, for instance, only 30 per cent. of the total potato crop is used for table purposes, and approximately 40 per cent. for stock feeding. On the other hand, in Canada 64.5 per cent. of the crop finds its way to the table and only about 11 per cent. for stock feeding. Stock raisers, says the Agricultural Situation and Outlook, recently issued by the Dominion Department of Agriculture and the Department of Trade and Commerce, would be well advised to inform themselves on the proper methods to ensure the best results. In brief, potatoes are in fact "watered" carbohydrate concentrates. They may be used, therefore, as a substitute for barley and corn, as in the rations of pigs, in which case it is important to bear in mind that four pounds of potatoes are equal to one pound of cereal meal.

New Island Appears

A small island has appeared in the Dardanelles near Gallipoli, between Charkeuy and Maurefte. It is about 1,050 feet long and 200 feet wide, formed of sand, pebbles and seaweed-covered rocks. At the same time hills and dunes on the adjoining coast line have caved in to form deep pits. Geological experts attribute the appearance of the island to the presence of oil under the sea floor of the Dardanelles.

This year marks the highest point reached in Soviet science and exploration in the 17 years of the country's existence.

A new type bathysphere now is under construction in a Leningrad scientific laboratory with which the Soviets hope to break the depth record set up by Dr. William Beebe.

This will be the first time that the Soviet has attempted to explore the depths of the ocean, but their success in the stratosphere has made them seek new fields.

In the Soviet campaign of "Conquer the Arctic for the Soviets" 776 ships will sail the Arctic waters this summer, establishing regular routes, prospecting for natural wealth, and filling in the white, unexplored regions on the map.

One ship, the ice-breaker "Sedov," will make an attempt to explore the stretches between 81 and 83 degrees northern latitude where only two ships have been in the past. It is believed that considerable stretches of clear water may be found in this region.

In the realm of aviation new planes are being built and new air lines opened. Special "freeze-proof" planes, insulated against all cold, have been built for Arctic flying. A trunk line using this type of plane will be opened during the year running all the way from west to east over the top of the world, from Murmansk to the Bering Sea.

Two new stratosphere balloons are being built for flight into the upper layers of the atmosphere this summer. They will have all the safety features possible to safeguard the lives of the pilots.

Future 'Plane Examined

Advisory Committee For Aeronautics Explain Details Of Year's Work

The skeleton of the aeroplane of 1940 was examined in detail at Langley Field, Va., by 250 aircraft engineers, designers and government officials.

Members of the research staff of the national advisory committee for aeronautics explained in detail the results of their work during the past year in boundary layer control, the airflow development of more efficient compression-ignition engines, and the decreasing of noise.

The new popular price monoplane of the bureau of air commerce was demonstrated in the large-scale wind tunnel, marking its first appearance. The machine has a small cabin, pusher type propeller, front pilot wheel to prevent overturning, and dual vertical and horizontal control fins.

Large Shipment Of Bees

Over 700 Packages From California For Alberta Apiaries

Millions of bees under the care of Prof. Eckert of the University of California arrived at Lethbridge on May 5th to be distributed later to apiaries in Southern Alberta. The 777 packages supplied by beekeepers in Southern California was the largest consignment ever received in the West. Prof. Eckert studied the bees en route and was well satisfied with their condition on arrival in Lethbridge. S. O. Hillerud, Alberta apiarist, met Professor Eckert at Spokane and travelled with him.

Canada exported to all parts of the world during the month of March, 1935, farm machinery and implements to the value of \$412,199. Included in the exports were 1,859 dozen spades, shovels and parts; 8,933 disc harrows and parts; 3,434 disc ploughs; 656 cultivators. 529 harvesters and binders; 216 mowing machines, and 81 hay rakes. The value of these exports for the 12 months ended March, 1935, amounted to \$3,567,258.

Benzol is a common source of severe poisoning to women in some industries, having a tendency to destroy the white blood cells and resulting in dangerous anemia.

The SNAPSHOT GUILD

You Don't Necessarily Need An Expensive Camera

You don't need an expensive camera to get fine pictures. The one above, taken with an inexpensive camera, won the grand prize in an international contest.

There seems to be the belief among many people that it is necessary to own an expensive camera to take good pictures. Pages could be written describing the limitations of some and the versatility of others, but as our space is limited the subject must be discussed rather briefly.

There are many types of cameras to meet every requirement of the photographer, whether he is an amateur or professional, but no camera is capable of taking all types of pictures under all conditions. It is true that some cameras are more versatile than others. One may have an extremely fast lens which permits the taking of snapshots under adverse lighting conditions and if it also has a very fast shutter you can take pictures of subjects moving at extreme speeds. Other cameras have lenses and shutters of various speeds to take pictures—and good ones—within certain limits and conditions.

What I want to impress upon you is this:—You do not necessarily have to own an expensive camera to take good pictures of the usual run of subjects. For instance, in an international amateur snapshot contest conducted not long ago by a large manufacturer of cameras, film and photographic supplies of all kinds, the Grand Prize of \$10,000 was awarded the picture taken with

an inexpensive camera, which goes to prove that intelligent use of a camera is the first requisite for good pictures.

The same rule applies to movie cameras—and here is the proof. Each year the American Cinematographer, a magazine published primarily for professional movie photographers, conducts an amateur movie contest and receives entries from practically every civilized country in the world.

Under the critical eyes of Hollywood's ace cinematographers, who acted as judges, small, inexpensive 8 mm. movie cameras won a brilliant victory for their owners in winning first and second awards in the 1934 competition. The final decision of these critical judges should convince the world's worst pessimist that he need not wait until he thinks he can afford an expensive movie camera before enjoying the thrills of amateur movie making.

There are thousands of people who are denying themselves one of the great pleasures of life in not owning a camera of some kind—"still" or movie—for there are models priced to meet the limitations or capacity of every pocketbook and all of them take good pictures—pictures you will enjoy now and in years to come.

Alberta Pioneer Passes Away

Last surviving officer of the first detachment of North West Mounted Police, established in 1874, longest service militia officer of the Dominion, western rancher, lumberman, and Calgary's best known pioneer, Col. James Walker died early Tuesday morning in the Holy Cross hospital. He was in his ninetieth year. A familiar figure to most residents of the city, Colonel Walker died following a brief illness.

Extend Farm Placement Plan

Extension of the farm placement scheme for single homeless men until April 30, a month longer than first intended, was announced Monday by provincial relief department officials. Decision to extend the period was made in view of continued bad weather conditions which have interfered with ordinary spring work. The extension means that the men will be able to remain on the farms for another month.

Crystal Dairy Bonspiel.

What will probably be the last curling event of the season got under way Tuesday evening and was continued on Wednesday afternoon and evening. This was the Crystal Dairy Bonspiel.

There are two events, the "Butter" and the "Jam." Each rink will have at least two games. The Crystal Dairy are donating the prizes in the "Butter" event and cans of jam are the prizes in the "Jam" event.

Burnside Notes.

Lone Pine Baseball Club are putting on a splendid play. All tangled up, to be followed by a dance this Friday evening April 3. Admission 25c to concert and 25c to dance. Ladies with cakes free. Come and have some fun and help the boys out in their efforts for good clean sport.

Lloyd Cipperey has returned from a week's visit to Calgary.

Miss Marjorie Burns spent the weekend with Miss Gattie McLean.

Ralph Long spent the weekend at the Thompson home.

Art Sawyer is engaged for the season with Mr. Harvey Strome.

Fred Metz is spending a few days this week in Calgary attending the fat stock show.

Knox United Church Notes.

On Sunday next, the first day of Passion Week, the pastor will take as his theme, "The Significance of the Cross." Following the service the Sacrament of the Lord's Supper will be observed. All our members are strongly urged to attend this service and offer that worship and praise which grateful hearts desire to give to our gracious God at this season of the year. We extend a most cordial invitation to all adherents and friends to attend divine worship next Sunday.

It is hoped also that it will be possible to have services at Westcott and Westerdale at the usual hours, 11 and 8 respectively.

Evangelical Church Notes

Next Sunday morning a special baptismal service will be held. All those desiring baptism should notify the pastor. The sermon subject will be, "The Meaning of the Psalms." In the evening, "Gideon and the Cross of Limitation," will close the series of Lenten sermons on Life's Crosses.

The Union Service on Good Friday will be held in the M.B.C. Church. Rev. J. R. Gerson will bring the message.

SOCIAL CREDIT NOTES.

Didsbury S.C. Group No. 1 held its regular meeting at the home of Mr. and Mrs. Schwesinger on Tuesday evening. It was moved and carried that this group is not in favor of any Social Crediter selling opposition newspapers directly or indirectly. Letters from Hon. Wm. Aberhart, Eric J. Poole, M.P. and E. P. Foster, M.L.A. were read, discussed and appreciated. It was decided to publish Mr. Poole's communication for the benefit of the electorate. A letter of complaint was forwarded to the Radio Commission concerning the cut-off of the Sunday evening broadcast from the Bible Conference. Edmonton. A delightful lunch and lively conversation brought the evening to a close.

The regular meeting of the Pioneer S.C. Group was held Monday night at the Paul Reshke home, when the "Fallacy of the Gold Standard" was discussed. The next meeting will convene at the home of Otto Klein on Monday evening, April 6th at 8 o'clock.

LOCAL & GENERAL

Mrs. Ranton went to Edmonton on Saturday to visit with relatives.

Don Phillipson visited with his brother, Ormond, at Edmonton over the week end.

Mr. Manasseh Weher was a business visitor to Edmonton over the weekend.

Archie Boyce will hold another Community Sale Saturday, April 4. Make your lineup with C. E. Reiber.

It takes a lot to keep Bill Davies from coming to town. He tried it Saturday. It took him 6½ hours—but he made it.

Miss Doris Friesen entertained a number of young friends at her home on Friday evening. Cards and dancing were enjoyed.

Mr. and Mrs. A. Hughes, who have been living in the Wigglesworth house this winter, left for Crossfield this week.

Owing to the bad state of the country roads Dave Madoch and Dave Burgess were marooned in town this week.

You will save money if you buy your Work Clothes from T. E. Scott.

Ruth and Samuel Thoman will play and sing during the Didsbury half-hour of dinner music this Friday from 12:15 to 12:45 over CJCJ.

The tennis meeting which was to be held last Monday evening has been postponed until next Monday, April 6th at 8 p.m., at the Public School.

Mr. Hector Baines, formerly of the Royal Bank here, and now of Calgary, visited with Mr. and Mrs. A. R. Kendrick and other friends over the week end.

Mr. Kenneth Burns returned home last week from the Olds School of Agriculture. He received his diploma after having completed a two-year term.

Weekend Special—4 Pr. All Wool Work Socks \$1.00. T. E. Scott.

Arthur J. Snyder is announcing that he is buying hogs and cattle at the Didsbury Yards for H. C. Beckner of Carstairs. He has taken over the business from Mr. Ray Lantz, who has been Mr. Beckner's buyer for several years.

The "Didsbury Half-Hour of Luncheon Music" is again to be heard over Station CJCJ each Friday noon from 12:15 to 12:45. Please requests for your favorites to J. V. Berscht's or Mac's Hardware.

The regular monthly meeting of the W.C.T.U. will be held at the home of Miss Z. Cressman on Thursday, April 9 at 3 p.m., when Mrs. Newton will give the topic, "Anti-Narcotics." All ladies are cordially invited.

Try a pair of our \$1.95 Carhartt Work Pants. T. E. Scott.

There was no lack of interest among the Didsbury hockey fans in the Western Canada finals played at Calgary. A number attended each of the three games. Kimberley got the best of Fort William in two out of the three games and will go to Winnipeg to meet the winner of the Eastern finals.

Weekend Special 24 Pairs No. 1 Genuine Horsehide Work Gloves to clear at 98c a pair.—T. E. Scott.

Doings of Our Neighbors

AT CARSTAIRS—The school board have had a good response to the offer of free vaccination of school children for smallpox and diphtheria and almost a hundred of the cards which were sent out have been signed by the parents and returned. This is almost 100 per cent.

AT OLDS—Olds high school and Bowden high school hockey teams played for the championship of the High School League at the local arena Tuesday of last week. Olds won out by a score of 3-2 in overtime.

With few clues available Royal Canadian Mounted Police officers are in search of thieves who broke into the post office at Torrington recently and made a get-away with approximately \$180.00 in currency.
